HEIRS OF THE PAST, MAKERS OF THE FUTURE

THE WALLINGTON WEEK

MESSAGE FROM THE HEAD TEACHER

It has been great to have enjoyed some sunny weather this week and it has been good to see students using the top field, at break and lunch, to chat with their friends and enjoy the warmer weather.

Public examinations continue this week for Years 11 and 13. Years 7 and 8 also have their end of year examinations this week so we wish them all the very best of luck. Students have been mindful of the need to be quiet around the various examination venues, so thank you to them.

This week's assemblies were in response to our pastoral survey where a number of students highlighted that they were worried about their futures. Using his friends as examples, Mr Parkinson spoke to students about the fact that they do not always need a definite plan and should certainly not be worried if they do not. Many of his friends are now doing jobs that do not relate directly to their degrees or the career plans they had whilst they were at school. His message was that all students need to do is try their best and try to take as many opportunities and experiences as possible. A thought-provoking assembly showing that students at WHSG, in particular, have lots to be positive about regarding their futures.

On Thursday we had a multi-day, the theme of which was 'express yourself'. Everyone certainly took the opportunity to do just that and it was great to see everyone get into the spirit of things. Overall, around £1000 was raised for charity.

Finally on Friday and over the weekend, around 70 Year 10 students undertook their Silver Duke of Edinburgh Award practice expedition. All seemed to go smoothly and many will now be taking their official expedition in a few weeks time.

JUNIOR MATHEMATICAL CHALLENGE

This term students from years 7 and 8 took part in the Junior Mathematical Challenge. This is a multiple-choice test that is sat by students across the UK. It encourages mathematical reasoning, precision of thought, and fluency in using basic mathematical techniques to solve interesting problems. The problems are challenging and designed to make even the most able students think!

The competition was tough this year and the thresholds for certificates were 84+ for Gold, 66+ for Silver and 52+ for Bronze. A score of 92+ meant a student would qualify to sit the Junior Kangaroo and a score of 120+ meant a student would qualify to sit the Junior Mathematical Olympiad.

It is a great achievement to have been awarded a certificate and we would like to congratulate and celebrate the success of the following students.

EXPRESS YOURSELF - MUFTI DAY

On Thursday, our students were able to celebrate their various cultures and backgrounds through our charity Mufti Day – Express Yourself. This Mufti, we have been able to raise roughly £1000 for charity.

Dress alongside attitudes, norms, traditions and foods are just one of the many human-made elements that makes up Culture that we can call our own. It was lovely to see the students on the field during their lunch time in the sun and laughing with their friends.

Here are a few photos of the day:

ANTHEA BELL COMPETITION

The MFL department is delighted to announce that four of our students have won prizes in the Anthea Bell Competition for Young Translators run by Queen's College, Oxford University. AROUND THE WORLD IN 60 MINUTES

KS3 MATHEMATICS/GEOGRAPHY SHOW

On Thursday 19th May a group of Year 7 and 8 students took part in a special workshop called “Around the World in 60 minutes”. In the show, the speaker, Zoe Griffiths explored the people and places of the world around us, through a series of engaging maths activities. Students took part in a hands-on exercise, a magic trick and an audience experiment. The workshop covered mathematical topics including spherical geometry, fractals and Benford’s Law, along with touching on human geography topics (such as the use of maps and populations) and physical geography topics (such as the nature of coastlines).

If you want to learn more about some of the ways Maths and Geography link you could watch this great Numberphile video about the maths of maps: <https://youtu.be/D3tdW9I1690> .

Also, if you wanted to find out more about finding shortest distance paths between airports using great circles you could look at this link... <https://www.greatcirclemap.com/>

Thanks to all the students who took part and helped to make the event a success, here is a review of the workshop written by Emma in 8Sha...

“I personally thought this workshop was great, with the speaker (Zoe Griffiths) making it extra fun. I was really fascinated by the spherical geometry and the hand magic trick. I was so thankful for the wonderful experience.”
