Careers embedded in academic curriculum.	Year 13 Interview Day.		MMI Evening University visits.	Personal guidance available if requested or referred.

UNIFROG and eClips allows our students to research career pathways and log their careers experiences so they can refer to them in the future. A weekly careers newsletter gives students exposure to different career pathways and opportunities throughout the school year. Our sixth form students are given time off to visit further education establishments and a comprehensive programme of support with their applications. Many departments have activities and trips, which are careers related, as part of their curriculums. The school holds regular parent events, and the school website also offers a huge amount of support for parents/ carers in helping their students make choices about their futures.
