GCSE Outcomes

The table below presents the average GCSE grades by subject over the past three years. We have used a three-year average to provide a more stable picture, as results can fluctuate from year to year.

It is important to interpret this data with caution. These figures reflect attainment but do not account for the prior ability of each cohort or the progress made. For example, a subject with a higher percentage of grades 7–9 may not necessarily have a higher progress score.

Students and their parents should not rely on this data when choosing GCSE subjects. Due to the factors outlined above, comparing one subject's results with another does not provide a meaningful basis for decision-making.
